

CONTENTS

Preface and Acknowledgments xi

SECTION 1. Symmetry and Space Groups

- Chapter 1.* Introduction 3
- Chapter 2.* Point Symmetry Operations 15
- Chapter 3.* Point Groups 27
- Chapter 4.* Periodicity 43
- Chapter 5.* Travel Symmetry Operations 55
- Chapter 6.* Two-dimensional Lattices 67
- Chapter 7.* Three-dimensional Lattices 79
- Chapter 8.* Two-dimensional Plane Groups 87
- Chapter 9.* Equivalent Positions 99
- Chapter 10.* Three-dimensional Space Groups, Part 1 111
- Chapter 11.* Three-dimensional Space Groups, Part 2 121
- Chapter 12.* Three-dimensional Space Groups, Part 3 133

SECTION 2. X-rays and Diffraction

- Chapter 13.* Generation of X-rays 145
- Chapter 14.* Diffractometers and Data Collection 157
- Chapter 15.* Data Reduction 167
- Chapter 16.* Scattering from a Single Electron 179
- Chapter 17.* Scattering from Atoms 189
- Chapter 18.* Diffraction from One-dimensional Arrays 199
- Chapter 19.* Diffraction from Two- and Three-dimensional Arrays 207
- Chapter 20.* Reciprocal Space and Reflection Indices 219
- Chapter 21.* Bragg's Law, Scattering Planes, and d -Spacings 225
- Chapter 22.* The Limiting Sphere, Resolution, and Indexing 235
- Chapter 23.* Structure Factors and Argand Diagrams 247
- Chapter 24.* Phases, Friedel's Law, and Laue Classes 255

- Chapter 25.* Centrosymmetry and Chirality 265
Chapter 26. Reflection Conditions 277
Chapter 27. Determining the Space Group of a Crystal 289

SECTION 3. Solving and Refining Crystal Structures

- Chapter 28.* Fourier Transforms in Crystallography 299
Chapter 29. Trial-and-error Methods 309
Chapter 30. Charge Flipping 319
Chapter 31. The Patterson Method 327
Chapter 32. The Heavy Atom Approximation 335
Chapter 33. Protein Crystal Structures 349
Chapter 34. Direct Methods, Part 1 361
Chapter 35. Direct Methods, Part 2 371
Chapter 36. Modeling the Electron Density 383
Chapter 37. Refining Crystal Structures 395
Chapter 38. Twinning 407
Chapter 39. Examples of Twinned Crystals 417
Chapter 40. Mistakes and Pitfalls 427
Chapter 41. Powder X-ray Diffraction 439
Chapter 42. Electron and Neutron Diffraction 451

- Appendix A. Vector Tutorial 457
Appendix B. Complex Number Tutorial 463
Appendix C. The Ewald Sphere 467
Appendix D. Atomic Form Factors 473
Appendix E. The Patterson Function 479
Appendix F. In-class Demonstration of Diffraction 483

- Bibliography* 487
Index 491
