

# Powerful Online Organic Chemistry Homework and Instruction Solution

for Sorrell *Organic Chemistry, Second Edition*

## Sapling Learning Benefits

Sapling Learning's online homework is a powerful and effective tool for your organic chemistry courses.

- Automatic homework grading
- Tutorial instruction
- Diagnostic feedback
- Algorithmic questions
- Dedicated support from chemists
- Engaging graded rich interactions
  - Molecule drawing
  - Chemical equation entry
  - 2D and 3D atom selection
  - Media and simulations
  - Labeling diagrams
  - Interactive spectra

## What Instructors are Saying about Sapling Learning

"I continue to be impressed with the Sapling site, and get excellent feedback from our students."

"Thank you for giving us a great homework system that our students love. The user-friendly interface and excellent palette as well as the pedagogically-effective questions make Sapling unique."

"The support your group has provided has been excellent."

## About the Text

Hailed by J Chem Ed as "the new wave" in organic textbooks, this book's mechanistic approach constructs organic chemistry from the ground up. By focusing on the points of reactivities in organic, this text allows students to approach more and more complex molecules with enhanced understanding. Also noteworthy are the biochemical examples for their variety, substance, and depth. Despite its unique emphasis on reactivity, the book facilitates easy adoption by covering organic compound classes in the traditional order.

## What Instructors are Saying about Sorrell Organic Chemistry

"Sorrell writes well, and has a knack for lucid explanations. He uses excellent examples and well designed exercises to make his points. The sections integrating chapter topics with biochemical examples are the best that I have seen. My students have found his book a pleasure to read."—Douglas Dykes, University of Colorado, Denver

"The Second Edition of Sorrell's Organic Chemistry is working well for our course on organic chemistry with a biological emphasis. It is a great combination of rigor and easy reading."—Martin Semmelhack, Princeton University
